G TARUN KUMAR

Bengaluru, India • tarungunnam1111@gmail.com • +91-6360475188 • linkedin.com/in/tarun-gunnam

PROFESSIONAL SUMMARY

B.Tech graduate in Computer Science and Technology with a specialization in **Artificial Intelligence and Machine Learning** (2025). Skilled in **Python, Django, REST APIs, SQL, MySQL, JavaScript, and ReactJS**. Hands-on experience developing web applications, backend services, database-driven solutions, responsive interfaces, and API integrations. Strong problem-solving, debugging, teamwork, and continuous-learning mindset with a focus on building reliable Python applications.

TECHNICAL SKILLS

Programming: Python, SQL, Advanced SQL

Backend & APIs: Django, REST APIs, ORM, Backend Development

Web Development: HTML5, CSS3, JavaScript, ReactJS, Responsive UI Design

Databases: MySQL, SQLite, Relational Databases, SQL Queries, Joins, Aggregations, Indexing

Tools: Git, GitHub, VS Code, PyCharm

EXPERIENCE

Python Full Stack Intern **Feb 2026 – Aug 2026**

Dhee Coding Labs (DCL), Bengaluru

- Developed web applications and backend services using Python, Django, JavaScript, ReactJS, SQL, and REST APIs.
- Built responsive interfaces and reusable ReactJS components using HTML5, CSS3, and JavaScript.
- Integrated frontend components with backend services through REST APIs and supported relational database workflows using Django ORM.
- Created and executed SQL and Advanced SQL queries for retrieving, filtering, joining, aggregating, and managing application data.
- Engineered Python and Django backend logic with relational database integrations and maintained application data quality through validation and cleaning workflows.
- Used Git and GitHub for version control, structured commits, and technical collaboration.

PROJECTS

Air & Water Quality Index Monitoring System

- Developed a web application for monitoring and visualizing Air Quality Index (AQI) and Water Quality Index (WQI).
- Designed interactive dashboards and integrated React UI components with Django REST APIs for application data processing and state management.
- Applied Python data-processing techniques to clean, aggregate, and evaluate multi-variable environmental datasets.

Vehicle Activity Monitoring System

- Built a web-based vehicle activity monitoring system using Python, SQL, and REST APIs.
- Implemented OCR-based vehicle number extraction to automate record capture and information processing.
- Designed relational SQL database structures and backend functionality for vehicle entry-log management and data synchronization.

EDUCATION

Presidency University, Bengaluru **2021 – 2025**

B.Tech in Computer Science and Technology CGPA: 6.59 / 10

Specialization: Artificial Intelligence and Machine Learning

CERTIFICATIONS & LEADERSHIP

Certifications: Machine Learning – Simplilearn; Introduction to Python; CSS Basics – HackerRank

Leadership: Class Representative (Semesters 1, 3–6), Presidency University — coordinated faculty-student communication and academic discussions.
